

Wagtails Free Puppy Toilet Training Tips

Warm, expert guidance to help your puppy learn where to go — and help you breathe again.

Toilet training is one of the biggest challenges new puppy parents face. The first few days can feel messy, confusing, and overwhelming — but with the right foundations, your puppy can learn quickly and confidently. These tips give you the **core principles** that work for every puppy. When you need personalised support, you can get **Toilet Training in Your Pocket** for real-time coaching when things get tricky.

The Five Musts

These are the key times your puppy is most likely to need the toilet.

“Immediately after a nap” **Ready for calmer days and fewer accidents?**

- “Immediately after a nap”
- “After a drink”
- “After eating”
- “After play”
- “After Training”

These moments are predictable, natural, and incredibly helpful for building a routine.

Pro-Tip An 8-week-old puppy needs to go to the toilet for the **5 musts** – **PLUS** every 20 minutes.

Build a Consistent Routine

Puppies learn fastest when life feels predictable.

- “Take your puppy regularly, do not expect them to take themselves.”
- “Take them to the same toilet spot every time.”
- “Consistency is key.”
- “Watch your puppy closely and learn their routine.”

Reward the Right Behaviour

“When your puppy goes to toilet in the right place give them an **IMMEDIATE** treat and lots of fuss.”

Immediate rewards help your puppy understand exactly what they did right.

What NOT to Do

“Do NOT tell your puppy off for toileting, this will only lead to sneaky wees and poos.”

Spot the Signs Early

Puppies often give subtle clues before they go.

- “Sniffing”
- “Circling (this often happens when they need a poo)”
- “Barking/whining”
- “Restlessness”

Pro-Tip When you are unable to supervise your puppy, they need to be in as confined a space as possible. A pen is ideal for this where space allows.

When You Need More Than Tips

Free tips give you the **what** and the **why**. But every puppy is different — and sometimes you need help in the moment.

That’s where ***Toilet Training in Your Pocket*** comes in.

Puppy Toilet Training in Your Pocket

Real-time WhatsApp support for one full week — exactly when you need it most.

With ***Toilet Training in Your Pocket***, you get:
